

I wish to comment regarding the above Proceeding number. I do not agree with this proposal, as it will allow these LPFM to take precedence over current FM translator service. I find value in having my local stations and I listen to these stations every day. We here in the community value our stations so much that one in particular, KLOVE, is supported solely by its listeners - they do not advertise. KLOVE serves as a station of encouragement to me and my community, and is a resource of love and service to the community. Not just mine, but to all the other cities & regions this radio broadcast has FM translators. This station would be forced off the air if you expand LPFM in the manner said in 04-233.
